

NO PEACE WITH NATO

THE STATE OF WAR IS GLOBAL. THEREFORE THE RESISTANCE HAS TO BECOME MORE INTERNATIONAL TOO. COME WITH US TO THE PROTESTS AGAINST THE NATO SUMMIT IN THE HAGUE!

War dominates the political discourse and the political decisions making of those in power. Armament and militarization are presented to us by them as guarantors of security and peace. In the age of the threat posed by the imperialism of the Russian regime, Western democracies should be able to defend themselves. There is no alternative, they claim.

Story time

We are not falling for their fairy tales. We know that record budgets for weapons do not create security and certainly not peace. Rearmament is the prelude and precondition for further escalation and conflict. The ruling political classes are mobilizing fears and resentment among the population in order to be able to enforce the new paradigm of 'getting fit for war'. It almost seems as if politics today is largely confined to this mode. What hardly anyone seems to have any reservations about is that Germany is once again undergoing a massive rearmament. How dangerous might the German Vaterland become this time?

Neither Putin nor NATO

Putin is a reactionary autocrat. We despise him and support the resistance against his regime wherever we can. But even if the Russian regime has attacked Ukraine, we are not on NATO's side. We have not forgotten: NATO's regime change strategies are responsible for countless crimes, wars of aggression in violation of international law, millions of

deaths, overthrown popular governments and the seizure of power by authoritarian-fascist regimes. It is the largest war criminal organization since the Second World War, from Iraq to Guantanamo, from Chile to Afghanistan. No matter how you look at it, and despite all the different political perspectives on the war over Ukraine, one thing can certainly not be said about NATO: that it has de-escalated. This organization has nothing to offer us - no security, no freedom, no solidarity. Its "peace" is not our peace. It is and remains a war alliance. It is a constitutive part of the emerging global war regime.

Good vs Evil

The democratic West must defend itself against the authoritarian East: This postulate is a diversionary tactic. Because the representatives of Western democracy are the Melonis, Trumps, Orbáns, Erdoğan and dozens of other reactionary and right-wing governments that are dismantling civil rights, sealing themselves off from migrants and using regulatory policy and discipline against the hard-won social rights of the working and non-working population. Those who believe they have to draw the line of conflict between West and East are not only deceiving themselves about their own abysses, but are also becoming one with NATO's narrative of being the best of all possible worlds.

War criminals to The Hague

The war criminal NATO meets in The Hague, the seat of the International Criminal Court. How fitting!

Unfortunately, however, the warmongers are not being brought to justice, but are holding their annual NATO summit. The complicity of the USA and Germany in particular in Israel's war crimes in Gaza is clear to all those who do not close their eyes or turn away. This applies to material support through arms exports to Israel as well as political backing and the disregard and contempt for Palestinian life and the crimes committed against them that pervades almost all media.

On May 11th, the new German Foreign Minister Wadephul is in Israel. At almost the same time, President Steinmeier receives Israeli President Herzog in Berlin. Both German statesmen praise the partnership with Israel. Neither of them talks about the genocide in Gaza. Neither of them talks about the arrest warrant against Netanyahu or former Defense Minister Gallant. The new German government thanks a far-right regime for the gift of friendship and buries international criminal and international law, to which it has supposedly committed itself, on the garbage heap of history. It's been a long time since complicity has been so self-satisfied.

From The Hague to Cologne

The Hague will be an important station in the emerging resistance against the global war regime. We will also be there. We invite our international comrades and friends to come with us. The political classes of our countries are preparing the war. Their central concern is to make our societies fit for war. We oppose and refuse to go along with their plans. The resistance against war has become a neuralgic moment to bring together our different political subjectivities and to unite our internationalist resistance. After

the protests in The Hague, we will come together again in Cologne at the end of August for a camp and discussions and take our common resistance to the streets.

Come with us to The Hague! Come to the Rheinmetall Disarm Action Week in Cologne! Stop the genocide in Gaza! Stop the war in Rojava! No deployment of medium-range missiles in Europe! Against their wars and against their peace!

Interventionist Left, May 2025

June 20th - 26th 2025

Anti-NATO-camp in The Hague

August 26th - 31st 2025

Rheinmetall disarmament camp and action week in Cologne
